Run PostgreSQL server and Pgadmin on minikube

Deploy Postgres

Create configuration file (.yaml)

[postgres-configuration.yaml](#)

```
apiVersion: v1

Deploy Pgadmin

      storage: 100Mi

```

```
kubectl apply -f <filename.yaml>
```

Connect pgadmin to server

```
minikube service <NamePgadminService>
```

1. Login Pgadmin
2. Server -> Properties
3. Change host name/address to Postgres service name -> postgres
4. Change username to one set in postgres config file -> admin

5. Change port (if not default) to ContainerPort (not Minikube service port) -> 5432
6. Connect to server
