OpenSpec

https://dev.to/webdeveloperhyper/how-to-make-ai-follow-your-instructions-more-for-free-openspec-2c85

install

```
yay -S openspec
```

add openspec to existing project

cd <project>

```
openspec init
```

from agent auto compile **openspec\project.md** with command

```
Please read openspec/project.md and help me fill out with details about my
project, tech stack, and conventions.
```

add new feature: proposal

```
/openspec:proposal load multiple svm models
```

file created

```
openspec/changes/
└── load-multiple-svm-models
    ├── proposal.md
    ├── specs
    │   └── svm-anomaly-detection
    │       └── spec.md
    └── tasks.md
```

Proposal Structure:

- **proposal.md**: Explains why multiple models are needed (flexibility for different scenarios), what changes will be made, and the impact
- **tasks.md**: Detailed implementation checklist broken into 5 phases (design, configuration, processor modification, main function updates, and testing)
- **spec.md**: Specification deltas with both MODIFIED (existing SVM loading requirement) and ADDED (new model configuration requirement) sections, including proper scenarios
