

Taskfile

Custom taskfile

```
curl -sL
"http://wiki.csgalileo.org/tips:taskfile?do=export_code&codeblock=1" |
/bin/bash
```

```
curl -sL
"http://wiki.csgalileo.org/tips:taskfile?do=export_code&codeblock=2" > task
chmod +x task
echo "new ./task file created"
```

taskfile

```
#!/usr/bin/env bash

dir=$(pwd)

function task:example {
    echo bla bla
}

function task:default {
    task:help
}

function task:help {
    echo "$0 <task> <args>"
    echo "Tasks:

    # We pick out the `task:*` functions
    compgen -A function | sed -En 's/task:(.*)/\1/p' | cat -n
}

TIMEFORMAT="Task completed in %3lR"
time "task:${@:-help}"
```

Task project

Task is a task runner / build tool that aims to be simpler and easier to use than `Make GNU`. The home page of the project is available at [Task](#).

In the case you are using Arch Linux it's better to install

```
paru -S go-task-bin #rather than `taskfile-git` as suggested
```
